Skills	Concrete	Pictorial	Abstract
<p>1.Repeated grouping/ repeated addition</p> <p><i>grouping, equal groups, group, part, equal, repeated addition</i></p> <p>How many times?</p>	<p>3×4 $4 + 4 + 4$ There are 3 equal groups, with 4 in each group.</p> 	 <p>Children to represent the practical resources in a picture and use a bar model. <i>Sentence stem: There 3 groups. There are 4 in each group. Altogether, there are 12 circles/ dots.</i></p>	<p>$3 \times 4 = 12$ $4 + 4 + 4 = 12$</p> <p><i>We are adding 4 three times.</i></p>
<p>2.Number lines to show repeated groups</p> <p><i>groups, groups of, lots of, multiply, multiplied by, times, steps, equal</i></p>	<p>$3 \times 4 = 12$</p>  <p><i>We can represent the groups of 4 using the Numicon shape 4. There are three 4s. Children count in 4s or lay 10 and 2 Numicon pieces over the top to find the total</i></p> <p>Cuisenaire rods could also be used.</p>	<p>Abstract number line representing the three groups of four.</p> 	<p>Abstract number line showing three jumps of four.</p> <p>$3 \times 4 = 12$</p>

<p>3. Use arrays to illustrate commutativity</p> <p>array, lots of, groups of, commutative, repeated addition, row, column</p>	<p>Counters, objects, Numicon pegs and other objects can be used.</p> <p>$2 \times 5 = 5 \times 2$</p>  <p>2 lots of 5 5 lots of 2</p>	<p>Children to represent arrays pictorially.</p>  <p>What's the same? What's different?</p>	<p>Children to be able to use an array to write a range of calculations, e.g:</p> <p>$10 = 2 \times 5$ $5 \times 2 = 10$ $2 + 2 + 2 + 2 + 2 = 10$ $10 = 5 + 5$</p>
<p>4. Partition to multiply</p> <p>partition, tens, ones, value, groups of, lots of, multiply, multiplied by, times, derive</p> <p>product, scale up</p> <p>commutativity associativity</p>	<p>Partition to multiply using Numicon, Base 10 or Cuisenaire rods.</p> <p>4×15</p> 	<p>Children to represent the manipulatives pictorially.</p>  <ol style="list-style-type: none"> 1. No exchange. 2. Exchange ones. 	<p>Children should be encouraged to show their process:</p> $\begin{array}{r} 4 \times 15 \\ \swarrow \searrow \\ 10 \quad 5 \end{array}$ <p>$10 \times 4 = 40$ $5 \times 4 = 20$ $40 + 20 = 60$</p> <p>A number line might be used alongside. Children move to applying their times table knowledge to using efficient jumping (second number line).</p>

<p>5.Introduction to formal written method</p> <p>partition, tens, ones, place value</p>	<p>Using place value counters (Base 10 could also be used).</p> <p>3×23</p> 	<p>Children represent the place value counters pictorially.</p> 	<p>Children record their process to show their understanding.</p> 3×23 $\begin{array}{r} 3 \times 20 = 60 \\ 3 \times 3 = 9 \\ 60 + 9 = 69 \end{array}$ $\begin{array}{r} 23 \\ \times 3 \\ \hline 69 \end{array}$
<p>6.Formal written method continued.</p>	<p>Using place value counters (Base 10 could also be used).</p> <p>6×23</p> 	<p>Children to represent the counters/ Base 10 pictorially.</p> 	<p>$6 \times 23 =$</p> $\begin{array}{r} 23 \\ \times 6 \\ \hline 138 \\ 11 \end{array}$  <p>Answer: 3224</p>

Conceptual Variation: different ways to ask children to solve 6×23

23	23	23	23	23	23
?					

Mai had to swim 23 lengths, 6 times a week.

How many lengths did she swim in one week?

With the counters, prove that $6 \times 23 = 138$

Find the product of 6 and 23

$$6 \times 23 =$$

$$\square = 6 \times 23$$

$$\begin{array}{r} 6 \quad 23 \\ \times \quad 23 \\ \hline \end{array} \quad \begin{array}{r} 23 \\ \times 6 \\ \hline \end{array}$$

What is the calculation?
What is the product?

100s	10s	1s
		

Mental Strategies

- Counting in multiples
- Repeated addition
- Arrays
- Links to doubling, including doubles to link x2, x4 and x8 tables
- Reorder calculation (**commutative**)
- Using known facts and place value
- Use the rule of **associativity**
- Scaling up using known facts
- Using the relationship between multiplication and division
- Use partitioning and **Distributive Law** to multiply
- Use **factor pairs** and the **Associative Law** to multiply
- Recognise and use square and cube numbers

https://nottinghamacademy.sharepoint.com/:b:/r/sites/spa_primary/Shared%20Documents/a4.%20CURRICULUM%20DOCUMENTS/Maths/Planning%20and%20Resources/NCETM%20Sentence%20Stems%20Multiplication%20and%20Division.pdf?csf=1&web=1&e=KOCKdY

Written Methods of Multiplication

Grid Method

20 x 3

$$\begin{array}{r|l} \times & 20 \\ \hline 3 & 60 \\ & 0 \\ \hline & 60 \\ & 0 \\ \hline & 180 \end{array}$$

Expanded form

135 x 6

$$\begin{array}{r} 135 \\ \times 6 \\ \hline 30 \\ 180 \\ 600 \\ \hline 810 \end{array}$$

Teaching Point

Do not stay here. Quickly progress onto compact as soon as possible

4 digit multiplied by a 1 digit

$$\begin{array}{r} 2513 \\ \times 7 \\ \hline 17591 \end{array}$$

Long multiplication

Teaching Point

Make Place value explicit. You are multiplying by 30 not 3. Multiples of 10 end in a zero, we can add the zero at the start.

$$\begin{array}{r} 27 \\ \times 34 \\ \hline 108 \\ 810 \\ \hline 918 \end{array} \quad \longrightarrow \quad \begin{array}{r} 270 \\ \times 32 \\ \hline 4748 \\ 70220 \\ \hline 74968 \end{array}$$

Multiplying decimals by integers – apply context of money and measure

$$\begin{array}{r} 784.9 \\ \times 6 \\ \hline 4909.4 \end{array}$$

Teaching Point

Ignore DP to start with. Complete calculation and then count DP back in e.g. 1DP in questions means = 1DP in answer.

$$\begin{array}{r} 47.3 \\ \times 62 \\ \hline 946 \\ 28380 \\ \hline 2932.6 \end{array}$$

Teaching Point

Ignore DP. Make it clear to line up as normal 3 digit x 2 digit, then count in DP after, otherwise place value is confused and method can become compromised.
